GEAR LIST

For Bear or Moose:

Clothing:

1 pair rain gear; I prefer stretchable pvc type rain gear. Helly Hansen Interface is what most of us personally wear. The key here is , easy to dry, and don't worry about the noise.

2 pair of fleece, or wool pants-avoid heavyweight style (I use Cabela's Legacy Fleece)

1 wool sweater, down jacket

1 fleece jacket, or pullover-midweight (Cabela's Legacy Fleece)

2 thermal shirts, Duofold, Thermax are very good-midweight, or lighter

1-2 thermal bottoms, (Duofold midweight has two layers of material, 1 layer wool, and 1 of 100% thermax)

1 extra fleece shirt or pullover

3-5 top quality hiking socks, Thorlo's Mountaineering sock are the best I have found to date. Cost around \$17 per pair, but worth it. Bridgedale also has great reputation. Coolmax sock material is generally considered cooler on the feet in warm environments. Do not, I repeat, do not skimp on socks, or try unfamiliar types for your hunt, buy the best and wear them before the hunt.

1 pair of Boots, preferably something lightweight for around camp, and the occasional time that hipboots are not in fashion. Waterproof is still preferred.

Waders or hip boots. I use both waist high breathable stockingfoot waders from Cabela's (Gold Medal model), and Lacrosse ankle fit hip boots.

Backpacks: I am currently using the Mystery Ranch G 7000 that is made in Montana. Capacities for all packs should be 6,000 cu. in. or more. External frames with similar capacities can be used if necessary. Apart from the Mystery Ranch I would look to Dana Designs and Gregory.

1 large pack cover-waterproof

Sleeping bag -Currently I am using the Alpinelite down bag from Western Mountaineering. The 6ft. model weighs in at 1 pound 15 ounces and I use the 6 ft. 6" model which is just over 2 pounds for a 20 degree bag. Synthetic bags rated around 15 -20degrees are fine as well. Spring hunters may consider a bag rated at 0 degrees.

Therma-rest self inflating pads are great, and I use the Pro-Lite 4. If full length pads are used they should be the models no wider than 20"s

1 hat, wool cap can be useful in late September.

Gloves-wool, or any waterproof glove is good, although neoprene tends to sweat, and gets clammy.

Outdoor Research Crocodile Gaiters for spring hunts come in handy when snowshoeing (16B)

Miscellaneous Gear:

Knives-avoid overweight Rambo knives. Small caping type knives are preferred.

Gun oil and maintenance tools. Critical tools to dismantle rifle in the field may save the day.

GSI Outdoors Lexan® 32 oz. Fairshare Mug (www.campmor.com) and additional small cup for coffee, etc.

Nalgene water bottles, at least 1, 32 ounce bottle

Spoon

Washcloth, towel-lightweight, soap, toothpaste and toothbrush, razor if you are so inclined. Packaged moist towelettes (baby wipes) are great for freshening up. Small bottle of shampoo, etc.

Flashlight-small LED headlamp, or similar. Headlamps are certainly preferred. I use a Petzl Myo XP LED.

First aid-prescriptions, ibuprofen, gel blister pads.

MSR Mini-Works - Water purifiers are essential in bear and moose country, as beaver a extremely common in most all waterways.

Binoculars-8x40 minimum, but 10x42, or 10x50 are best, higher grade glasses permit longer viewing with less eye strain, which brings better results in the long run-don't skimp if you are purchasing for the first time.

Spotting scope is optional, but recommended if you are going to constantly want to look through your guide's scope.

Laser rangefinder is optional, as guides pack one.

Rifles and cartridges should be discussed prior to the hunter's arrival.

20 rounds of Ammo should be sufficient, but 30 is not too much.

Length of nylon rope has many uses.

Emergency space blanket, -Thermo-Lite® Emergency Bivy Sack by Adventure Medical (www.campmor.com)

Insect repellent.

Camp Time Roll-up Pack Stool®

Sunglasses

Sunblock

Mosquito head net may be desirable for some individuals.

Weight:

Individuals need to keep their gear under 60 pounds, excluding rifle, due to load constrictions on chartered flights.
